SKILLS

Web Development: React.js, Next.js, Typescript, JavaScript (ES5 and ES6), HTML/HTML5, CSS/CSS3, SCSS, Tailwind CSS, Node.js, Express.js, PostgreSQL, Relational Databases, Heroku, Netlify, Postman, Git, GitHub, GitLab, RESTful API, APIs, Agile Methodology

Soft Skills: Resourceful, Curious, Willing to learn, Self-motivated, Leadership, Teamwork, Communication, Attention to detail

WORK EXPERIENCE

Guitar Center Stores Inc.
March 2023 - Present

- Utilize Next.js, Tailwind CSS, JSX, HTML, CSS, and JavaScript to develop and update web pages for Guitar Center and its subsidiary, Music & Arts, that are responsive to all screen sizes
- Responsible for updating promotions and text on multiple pages, redesigning whole pages, and fixing bugs in the front-end code base
- Work with a UI/UX designer to collaborate on page designs and create new pages based on their finalized designs in Figma
- Follow Agile methodologies to update web pages

PROJECTS

got coffee?:

- "got coffee?" is a coffee shop website that utilizes the "pages" folder in Next.js to create unique URL pages
- This was my first project using Next.js, where I focused on familiarizing myself with the "pages" folder and working on improving my website styling
- I utilized server-side generation for pages where the data required to render were available at build time
- Technology used: Next.js, React.js, Typescript, SCSS, JavaScript, CSS, HTML

Order 8:

- "Order 8" is a puzzle game where the user must rearrange 8 number tiles into numerical order in a 3x3 grid
- Includes a timer to track how long the user takes to solve the puzzle
- Randomizes tile locations on "Restart"
- First implementation of Typescript, designed and created within 2 days
- Technology used: React.js, Typescript, SCSS, JavaScript, HTML, CSS

RemindMe:

- "RemindMe" is a CRUD website that tracks the user's reminders and displays the time remaining until the deadline
- Utilizes Node.js, Express.js, PostgreSQL, and RESTful API calls to authenticate user login credentials as well as access and manipulate user reminder data
- This project was originally created using React.js, JavaScript, HTML, and CSS, but was redesigned to improve the appearance and allow the use of back-end technologies using a PERN (PostgreSQL, Express.js, React.js, Node.js) tech stack
- Unique URLs for every user created with React Routes
- Technology used: React.js, PostgreSQL, Node.js, Express.js, SCSS, JavaScript, HTML, CSS

MovieTracker:

- "MovieTracker" utilizes the external API, The Movie Database API, to allow users to make lists of movies they have watched and have not watched
- Utilizes Node.js, Express.js, PostgreSQL, and RESTful API calls to authenticate user login credentials as well as access and manipulate user movie data
- This project was originally created using React.js, JavaScript, HTML, and CSS, but was redesigned to improve its appearance and include back-end technologies to save user data using a PERN tech stack
- Unique URLs for every user created with React Routes
- Technology used: React.js, PostgreSQL, Node.js, Express.js, SCSS, JavaScript, HTML, CSS

EDUCATION

University of California - San Diego   **September 2016 – June 2020**
B.A. in Physiology & Neuroscience
Minor in Computer Science
